

**JIMMY'S LAWN AND LANDSCAPING LLC
53 KNORR ROAD
MONROE, CT 06468
(203) 268-4959**

Thank you for choosing Jimmy's Lawn for your fertilizing needs. We offer several programs to better suit your individual needs. We ask that you circle the appropriate services, sign and return the completed form as soon as possible. Also, be sure to make any changes to your name, address, email or phone numbers.

By signing below, I hereby authorize Jimmy's Lawn and Landscaping to fertilize my lawn for the season. I would like Program # _____ & _____ to best suit my needs.

I am concerned about lawn fungus. Please make applications of fungicide as needed. I understand there is an extra cost.

All fertilizer must be watered in by homeowner for chemicals to work effectively. Products should be watered in, 24 hours after application for best results. If not watered, control will be lessened.

Applications for fungus etc. are an additional cost. Please check box if you want preventative applications to help resist fungal damage.

All lawns are limed, at an additional cost, with pelletized lime at the time of the 1st application unless requested not to. (Liming helps the grass use the fertilizer more efficiently.)

OVER-SEEDING ~ AERATING ~ MULCHING ~ DUMPSTERS

Please see other side to make your program choices and see descriptions

CHOOSE YOUR LAWN PROGRAM:

- **PROGRAM # 1** \$ _____
This program consists of four applications of high-quality fertilizer, mixed with crabgrass and insect control.
These chemicals are all registered with the State of CT and are used in very small amounts. This reduces the possible need for much stronger chemicals and re-seeding when a problem occurs. This would also include a modest amount of post emergent weed control.
- *****PROGRAM # 2 ***** \$ _____
This program consists of five applications, similar to program 1. The fifth application during the year would allow us to use optimum time intervals.
Timing is crucial for the chemicals to do the best job controlling pests.
During several of the applications, an addition of post-emergent weed control would be applied to help controls weeds in the turf areas.

SHRUB FERTILIZATION

- **PROGRAM # 3** call for price \$ _____
Protect your investment! This program would consist of one application of fertilizer to your plants, which will help keep them healthy and resist diseases.
The plants would also be sprayed for insect control 2 times during the season and checked for other problems.

Other services that can be combined with any program at an additional cost are:

- Tick Control - Call for details, depends on ground covers, woods, etc.
- Deer Control - 2 applications of a non-toxic deer repellent to shrubs. (Repels by taste.)
- Property Sprays to help prevent and control pests.
- Over seeding to help thicken your lawn
- Core aerating
- Spraying of poison ivy when detected.
- Spraying of unsightly weeds growing in drives etc.
- Controlling of fungus when detected.
